1. Emploi et fonctionnement

Le Filter-Cell XL *KEMPER* est conçu pour l'aspiration et la filtration d'émanations nocives générées par les différents procédés de soudage. Il est utilisable dans tous les cas où il y a génération d'émanations sous forme de particules. Il est toutefois nécessaire de veiller à ne pas aspirer d'étincelles provenant d'un travail de meulage ou de ponçage. Les émanations générées sont captées par la hotte d'aspiration et entraînées vers le filtre par le flux d'air. Là, les particules sont retenues à la surface des cartouches filtrantes. Elles sont décollées par une impulsion d'air comprimé et retombent dans le bac à poussières vidangeable. L'air purifié est aspiré par le ventilateur et reconduit dans l'atelier en passant dans un silencieux. Le recyclage des fumées fortement cancérigènes (par ex. inox) est uniquement autorisé si l'appareil est contrôlé et certifié.

2. Consignes de sécurité

Attention:

Lors de l'utilisation d'appareils électriques, il est nécessaire de prendre les mesures de sécurité suivantes, afin d'éviter des blessures ou brûlures!

Lisez cette notice avant d'utiliser l'appareil:

- Conservez cette notice à un endroit bien accessible
- L'appareil doit être transporté debout et protégé contre les coups, le renversement ou l'eau
- N'utilisez pas cet appareil pour l'aspiration de gaz ou de poussières inflammables ou explosifs (poussières d'aluminium ou de bois)
- N'aspirez pas de vapeurs humides
- Posez l'appareil de façon stable en bloquant bien les roulettes
- N'employez que des pièces de rechange d'origine
- Vérifier les filtres et n'utilisez pas la machine sans cartouche ou avec une cartouche défectueuse
- Protéger la machine de l'humidité
- Avant ouverture, débranchez la machine
- Tenir compte des indications portées sur la plaque signalétique
- N'employez pas cette machine pour l'aspiration de fumées contenant des brouillards d'huile
- Protégez le câble d'alimentation contre la chaleur, l'huile et les objets coupants
- Veuillez à ce qu'aucun objet ne pénètre dans les ouvertures d'aspiration ou de refolement

3. Mise en service

• **IMPORTANT!**

Avant l'utilisation de l'appareil veuillez vous assurer que le carter d'extraction comme représenté sur le dessin technique est à nouveau fixé avec les vis à tôle. À cet égard, veuillez respecter la direction d'extraction, le carter d'extraction doit être orienté vers le haut.

- Tenir compte des indications portées sur la plaque signalétique
- Raccorder l'appareil au réseau électrique
- Mettre en marche brièvement l'appareil et l'arrêter. A travers une petite vitre se trouvant au bas de l'appareil, vérifier le sens de rotation du ventilateur. Il doit être conforme au sens indiquée par la flèche sur le caisson. En cas de faux sens de rotation, interchanger deux phases.
- Raccorder l'appareil au réseau d'air comprimé, à l'aide d'un tuyau à air comprimé avec fermeture rapide (le raccord se trouve au dos de l'appareil). L'air comprimé doit être sec, propre et déshuilé et avoir une pression de 4 - 6 bar.
- Le filtre est maintenant prêt à fonctionner

4. Eléments de commande et fonction

① Interrupteur
MARCHE/ARRET

② Témoin de marche

Le filtre est équipé d'un système de décolmatage, déclenchant automatiquement un cycle de nettoyage.

5. Entretien

5.1 Vidange du collecteur de poussières

Le collecteur de poussières doit être vidé en intervalles réguliers.

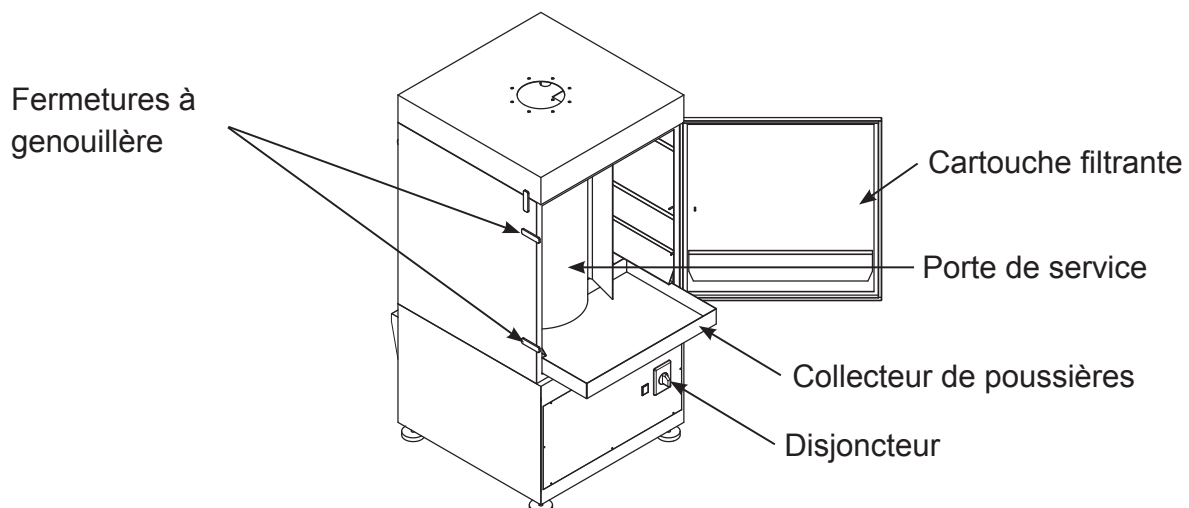

- Éviter le contact avec les poussières, en utilisant des masques, gants et sacs plastiques (pour le collecteur de poussières) avec liens de fermeture, fournis avec le bac de rechange.
- Procéder à la vidange lorsque l'appareil est arrêté, pour éviter qu'à l'ouverture de la porte des poussières volantes pénètrent dans le système respiratoire de l'intervenant.

Attention:

L'inspiration de particules de fumées de soudure provenant en particulier du soudage sur des aciers alliés peut provoquer des problèmes de santé. En contact avec la peau, elles peuvent provoquer des irritations chez les personnes sensibles.

- Arrêtez l'appareil en utilisant le disjoncteur moteur
- Débranchez le câble d'alimentation
- Attendez quelques minutes jusqu'à ce que la poussière se soit posée dans le bac à poussières.
- Enlevez les charnières et ouvrez doucement la porte de service afin d'éviter de soulever la poussière
- Retirez partiellement le bac à poussières
- Passez le sac de vidange par-dessus le bac en évitant de soulever la poussière et retirez l'ensemble
- Videz le bac à poussières
- Fermez le sac à l'aide du lien
- Si le bac à poussières est endommagé remplacez-le et évacuez-le selon les prescriptions locales
- Remettez le bac à poussières et mettez éventuellement un nouveau bac.
- Fermez la porte de service et bloquez-la à l'aide de la bride de fermeture
- Rebranchez le câble d'alimentation
- Rallumez l'appareil en utilisant le disjoncteur moteur
- L'appareil est à nouveau prêt à fonctionner

Les poussières recueillies sont des déchets spéciaux et doivent être traitées selon les prescriptions en vigueur.

5.2 Vidange du condensat du réservoir à air comprimé

Il est recommandé de vider le condensat se trouvant dans le réservoir à air comprimé en même temps que le bac à poussières. A droite du raccord à air comprimé se trouve un robinet à pointeau. L'ouvrir doucement et laisser le liquide s'écouler. Le refermer dès l'arrivée d'air.
