

VacuFil Compact

Compact design

The compact design with large handle and comfortable wheels underlines the mobile use in workshops

High extraction

integrated side channel compressor ensures a permanently high extraction power, which is infinitely adjustable on the unit

Intuitive one-button operation

Easy operation of the unit even with protective gloves by means of only one multifunctional button

Start-Stop automatic (optional)

The link to the welding machine is saving time and energy

Monitoring of the extraction rate (optional)

Thanks to the automatic extraction rate control, the air volume flow remains constant even with increasing filter saturation
