KEMPER®

ProfiMaster

360° Radius
Maximum flexibilty of exhaust arm for use without any restrictions.

Comfortable operation
Comfortable adjustment of self-supporting exhaust arm into every desired postion with only one hand.

One unit for two workstations
Space saving and economical: Simultaneous or alternate use at 2 workstations.

Reliable industrial quality
Robust filter unit with high capacity filter.

2 -Stage filter
Long filter life due to pre-filter and 17 m² mainfilter.

40 % better capture rate
Less re-positioning work of exhaust arm due to larger capture area of the flanged hood.

AUTO

Start-Stop automatic (optional)
The link to the welding machine is saving time and energy.
