

# PlasmaFil Pro

Art. No.: 32 20 14

## Applications

- High levels of smoke and dust
- Welding and grinding shops
- Training centres and robotic welding lines
- Laser, plasma and flame cutting systems
- Can be installed outdoors
- Specifically suited for plasma or flame cutting processes

## Benefits

- Contamination-free dust collection due to compressed air fixation of dust collection containers
- Uninterrupted continuous operation due to automatic differential pressure-controlled filter cleaning
- Little noise emission due to a low noise level
- Quick and simple set up, delivered ready to plug in with forklift pockets and lifting eyes \*<sup>1</sup>
- Considerable energy cost savings by using the automatic extraction volume control
- Convenient operation due to intelligent control via touch screen with diagnostic system
- Best health protection for employees by use of KemTex® ePTFE cartridges with surface filtration
- Recirculation is possible even when using chrome-nickel steel thanks to W3 certification

## Properties

- KemTex® ePTFE filter cartridges
- Automatic filter cleaning on required basis
- Highly effective and uniform filter cleaning by means of rotary nozzle
- Control via compact touch information display
- Low noise emissions thanks to extremely low noise level
- Quick and easy installation thanks to user-friendly preparation
- Low space requirement due to compact design

## Accessories

- Dosing unit for pre-coating the filter cartridges
- Automatic extraction volume control
- Fleet management, remote maintenance and pre-noise maintenance using autarkic networking via mobile radio to the KEMPER cloud
- Spark separator – SparkTrap
- Automatic start-stop
- Weatherproof housing for outdoor installation

## Technical Data

Filter	
Filter stages	1
Filter method	Cleanable filter
Filter cleaning method	Rotating nozzle
Filter surface	10 m <sup>2</sup>
Number filter elements	4
Filter surface total	40 m <sup>2</sup>
Type of filter	Filter cartridge
Filter material	ePTFE membrane
Filter efficiency	> 99.99 %
Dust classification	M
Basic data	
Max. fan performance	3000 m <sup>3</sup> /h
Extraction capacity	1250 - 2160 m <sup>3</sup> /h
Vacuum	2600 - 2280 Pa
Weight	425 kg
Motor power	3 kW
Power supply	3 x 400 V / 50 Hz
Rated current	6.5 A
Noise level	65 dB(A)
Additional information	
Fan type	Impeller, direct driven
Compressed air supply	5 - 6 bar
Air outlet	250 mm
Air intake	250 mm
Capacity Dust collection container	34 l

## Technical Data

### Dimensions

A	962 mm
B	1302 mm
C	962 mm
D	2110 mm
E	3230 mm
F	250 mm
G	1146 mm
H	1716 mm
I	706 mm
J	175 mm
K	250 mm
L	669 mm
N	293 mm
O	896 mm
P	355 mm

The shown transition pieces are optional

# Pressure-volume graph

- Fan characteristic curve
- Working pressure increase
- Recommended Use

$$\frac{\Delta P_{s \text{ stat.}}}{Pa}$$

$\vec{V} / m^3/h$
