

Protection Strip S0, Transparent

Art. No.: 70 201 044

Applications

- For separating individual work and factory areas
- Protection against dust, drafts, wet and grinding sparks

Benefits

- Individual protection configuration by selecting degree of overlap
- Can be moved aside due to being attached to C-profile
- Passages can be created at several points in the partition since the individual elements in combination with a C-profile can be pushed aside in both directions
- Installation made easier and time is saved when mounted on folding KEMPER suspension brackets

Technical Data

Basic data	
Width	400 mm
Thickness	4 mm
Weight	2,00 kg/m kg
Colour	transparent
Type	S0

Properties

- Self-extinguishing, class K 1, as per DIN 53 438, part 2
- Suspension by means of suspension brackets or pipe clamps on a tube or C-profile
- Strip overlap of 33%, 66% or 100%
- Can be installed in fixed position or laterally movable
