

# Suction and pressure hose up to 100°C

Art. No.: 114 0727

## Applications

- Extraction of dust and fine shavings
- Air conditioning and ventilation
- Welding fume/dust extraction

## Properties

- PVC coated polyester fabric
- Very light and flexible
- Fire retardant and compressible
- Temperature range : up to + 100 °C
- permanently antistatic ( $R \leq 10^8 \text{ Ohm}$ )

## Scope Of Supply

- Two hose clamps
- 

## Technical Data

| Basic data             |                        |
|------------------------|------------------------|
| Working pressure in PA | 8000 Pa                |
| Diameter               | 200 mm                 |
| Lenght in m            | 10 m                   |
| Material               | polyether polyurethane |
| Bending radius         | 140 mm                 |
| Weight                 | 1.02 kg/m              |
| Wall Thickness         | 0.4 mm                 |
| Colour                 | transparent            |
