KEMPER Connect – 1 year

Art. No.: 999 73 001

Technical Data

Basic data	
License term	1 year

Applications

- Central monitoring and control of IoT-enabled KEMPER extraction systems via the KEMPER Connect platform
- Fixed license assignment to one IoT-enabled KEMPER device, no device change possible
- License activation directly in the KEMPER Connect portal using a voucher code
- Suitable for KEMPER extraction units, central filter systems, ventilation systems and air monitoring devices (e.g. AirWatch)
- Intelligent linking of AirWatch with extraction and ventilation systems (e.g. AirDome, CleanAirTower) for automated system control
- Location-independent access to system and sensor data
- Time-based control of systems via integrated timer and calendar functions

Benefits

- Automated control of extraction and ventilation systems when limit values are exceeded
- Email notifications and alarms in critical conditions for maximum operational safety
- Support for data-based decisions and transparent documentation
- Real-time monitoring of product-specific operating parameters
- Demand-based and time-controlled system operation for maximum energy efficiency
- Central fleet management of multiple devices via a single dashboard
- Clear overview of operating status, air quality, and service and maintenance information

Properties

- Cloud-based platform for visualization, analysis, and long-term storage of IoT data
- Alarm and notification system
- Rule-based automation functions (limits, schedules, calendar functions)
- Long-term data logging, reporting, and trend analysis
- Cross-device and cross-topic overviews (e.g. air quality, service & maintenance)
- Latest mobile connectivity for device control independent of the company network
- License-based use: after license expiry, functions and data are no longer available
- Easy license renewal via voucher code through the KEMPER Connect platform
- When the license is renewed, previously recorded data becomes fully accessible again
