Dust collection drum for central extraction systems

Art. No.: 135 0474

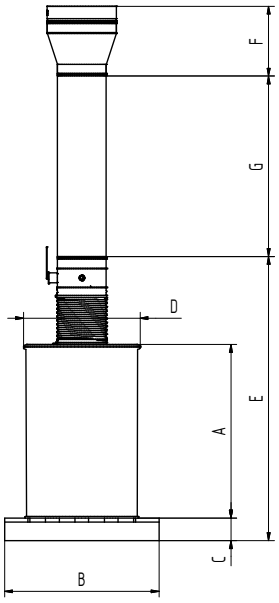

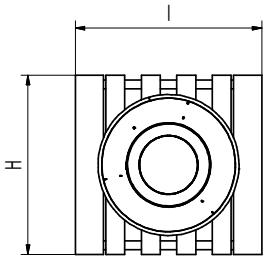

Properties

- The downpipe is 3 m long as standard and can be cut to the required length or extended on site
- Capacity: 212 litres
- The filter system must be placed on a platform at the customer's premises
- For filter systems from 3440 or larger, and PlasmaFil, LaserFil and ArcFil; the specification must be determined on a project-by-project basis
- Including downpipe with shut-off valve, nominal diameter NW 250 mm
- Dust collection for centralised filter systems; replaces the system's dust collection trolley

Technical Data

Basic data	
height	1450 mm
Diameter	610 mm
Weight	16,5 kg
Filling volume Dust collection container	212 l

Technical Data

Dimensions	
A	880 mm
B	790 mm
C	115 mm
D	610 mm
E	1435 mm
F	360 mm
G	min. 100 mm
H	760 mm
I	790 mm
