

ProfiMaster

Comfortable operation

Comfortable adjustment of self-supporting exhaust arm into every desired position with only one hand.

360° Radius

Maximum flexibility of exhaust arm for use without any restrictions.

2-Stage filter

Long filter life due to pre-filter and 17 m² mainfilter.

Reliable industrial quality

Robust filter unit with high capacity filter.

40 % better capture rate

Less re-positioning work of exhaust arm due to larger capture area of the flanged hood.

Start-Stop automatic (optional)

The link to the welding machine is saving time and energy.
