

MaxiFil Clean

Comfortable operation

Comfortable adjustment of self-supporting exhaust arm into every desired position with only one hand.

Less energy costs

Low compressed air usage due to differential pressure controlled filter cleaning as and when needed.

LED work light (optional)

Allows a good view onto the workpiece which leads to a better performance and supports the operator to re-position the hood.

Non-stop operation

Suitable for high levels of smoke and dust due to automatic filter cleaning.

40 % better capture rate

Less re-positioning work of exhaust arm due to larger capture area of the flanged hood.

Contamination free dust disposal

No contact with hazardous fine dust due to dust-free dust removal into collection cartridge.

Centrifugal pre-separator

Longer filter life due to efficient pre-separation of sparks and coarse particles.

Start-Stop automatic (optional)

The link to the welding machine is saving time and energy.
